

NCIE-008 Skeletal v0.1 → Full v1.0

Full-Expansion Change Register

Governance, Authority, Accountability & RACI Specification — IN DEVELOPMENT / FOR HUMAN REVIEW

Pre-Approval Surgical Correction Record

This is a pre-approval CORRECTION to v1.0, not a v1.0→v1.1 amendment — the specification version is unchanged and remains unapproved. Two verified control defects in the initial v1.0 build are corrected here: (1) HR8-25-1 Human Review reconciliation — Chapter 25's own closing Human Review item was rendered as a bullet but never folded into the Complete Register table or its totals, producing an orphan item and understated counts; (2) Chapter 26 governance acceptance-test gap — the production directive's required acceptance-test suite (9 named tests) was missing, and the existing NCIE-016 handover cross-reference pointed at the wrong section as a result. No other chapter, doctrine, RACI assignment, decision-right class or SoD rule was reopened, redesigned or renumbered.

Maps each of the 26 approved NCIE-008 Skeletal v0.1 chapters to its expanded v1.0 location, states the authority basis for the expansion, and records the effect on that chapter's Human Review Focus item. No chapter was added, removed, merged, split or renumbered; every approved chapter purpose, salient note, principal component, upstream dependency focus and Human Review focus is substantively represented below.

		acceptance-test suite, 9 tests, NEW), Table 31 (downstream handover, 6 rows), HR8-26-1.		(skeleton approval already satisfies it). ADDED: §26.5 Governance Acceptance Tests (GAT-1..GAT-9, all TEST SPECIFIED, none executed); renumbered old §26.5/§26.6 to §26.6/§26.7; corrected the NCIE-016 handover cross-reference to point at the new §26.5.	

Consolidated Matrices Added (Directive Items 46-48)

Table 5 (Chapter 4) — consolidated Decision-Right Matrix across all 11 decision classes. Table 7 (Chapter 6) — consolidated Segregation-of-Duties Matrix across 7 incompatible-function pairs. Table 30 (Chapter 26, NEW) — governance acceptance-test suite across 9 test classes, all TEST SPECIFIED / none TEST EXECUTED. Every other chapter carries its own chapter-appropriate RACI table (Tables 2-3, 6, 9-26) using the abstract role-class taxonomy defined in Chapter 3, per directive item 46.

Human Review Register Reconciliation (Corrected)

26 Human Review items total (corrected from the initial build's 25): 24 items from Chapters 1-24 (mechanically extracted from each chapter's own Human Review Focus bullet text), plus HR8-25-1 (Chapter 25's own item — now reconciled into the Complete Register table, correcting the defect in which it was rendered as a bullet but omitted from the table and its totals) and HR8-26-1 (Chapter 26's own item). Classification breakdown: 22 Institutional Confirmation Required (21→22, +HR8-25-1), 1 Proposed Design Default, 1 Legal/Policy Confirmation Required, 1 Security/Sovereignty Confirmation Required, 1 Resolved by Upstream Baseline. 21 Blocking (20→21, +HR8-25-1) / 5 Non-Blocking. 0 duplicate Review IDs; 0 orphan Human Review items — every Human Review ID appearing anywhere in the final specification (26 unique IDs, independently extracted) is reconciled into the Complete Register. No item manufactures closure of a decision the approved skeleton or upstream chain does not itself settle, and no unrelated item was added, resolved, reclassified or merged during this correction.

Skeleton Fidelity Statement
