

NCIE-009 Skeletal v0.1 → Full v1.0

Full-Expansion Change Register

Security, IAM & Zero-Trust Architecture — IN DEVELOPMENT / FOR HUMAN REVIEW

Pre-Approval Surgical Correction Record

This is a pre-approval CORRECTION to v1.0, not a v1.0→v1.1 amendment — the specification version is unchanged and remains unapproved. Independent human examination (David King Boison, PhD — Academic Intelligence Center) found that Chapter 27 (Human Review Register & Open Security Decisions) was missing its required explicit '27.0 Salient Things to Note' subsection — a directive item 5 hard-gate violation — and that this Change Register's and the Verification Report's blanket skeleton-fidelity statements incorrectly certified 28/28 chapters compliant. A '27.0 Salient Things to Note' subsection was inserted using the already-approved skeletal Chapter 27 salient content verbatim; no new security doctrine, Human Review item, or security control was introduced, and no other chapter was reopened or renumbered.

Maps each of the 28 approved NCIE-009 Skeletal v0.1 chapters to its expanded v1.0 location, states the authority basis for the expansion, and records the effect on that chapter's Human Review Focus item. No chapter was added, removed, merged, split or renumbered; every approved chapter purpose, Salient Things to Note, principal security component, upstream dependency and Human Review focus is substantively represented below.

Consolidated Security Matrices Added (Directive Item 48)

Table 7 (Chapter 5) — Identity-Assurance Matrix. Table 9 (Chapter 6) — Authorization-Decision Matrix. Table 11 (Chapter 7) — Delegation Matrix. Tables 13 and 15 (Chapters 8-9) — Privileged/Break-Glass Matrix, Parts 1-2. Table 25 (Chapter 18) — Data-Flow Security Matrix. Table 39 (Chapter 28) — Security-Control-Ownership Matrix, consolidating every control domain's owning chapter and NCIE-008 decision-right class. Table 3 (Chapter 2) additionally provides the Threat-Control Traceability Matrix required by directive item 49. Every other chapter carries its own chapter-appropriate RACI/control-ownership table.

Human Review Register Reconciliation

28 Human Review items total: 26 items from Chapters 1-26 (one per chapter, mechanically extracted from each chapter's own Human Review Focus bullet text), plus HR9-27-1 (Chapter 27's own item) and HR9-28-1 (Chapter 28's own item) — both defined once and included in the register from the start, per the lesson learned from the NCIE-008 v1.0 correction, rather than appended afterward. Classification breakdown: 24 Institutional Confirmation Required, 3 Security/Sovereignty Confirmation Required, 1 Resolved by Upstream Baseline. 24 Blocking / 4 Non-Blocking. One item, HR9-1-1, is cross-referenced (not duplicated) against the identical institutional question already open as NCIE-008 HR8-10-1, per directive item 51's upstream-deduplication rule. No item manufactures closure of a decision the approved skeleton, the approved NCIE-008 governance layer, or the approved upstream chain does not itself settle.

Skeleton Fidelity Statement (Corrected)

Every approved Chapter Purpose, Salient Things to Note, Principal Security Component, Upstream Dependency/Authority and Human Review Focus from the approved NCIE-009 Skeletal v0.1 is substantively represented in the corresponding v1.0 chapter above, including an explicit Salient Things to Note subsection in every chapter operationalized into controls, limitations or acceptance criteria (directive item 5 hard gate). This statement was rerun against the corrected final document — not restated from the prior (false) claim — and now confirms all 28 chapters, including the corrected Chapter 27; none is omitted and none is conceptually inverted (Chapter 28 §28.3).
