

NCIE-015 Skeletal v0.1 → Full v1.0 Full-Expansion Change Register

DevSecOps, Infrastructure & Deployment Specification — IN DEVELOPMENT / FOR HUMAN REVIEW

Formal-Title Reconciliation (Directive Item 3)

The Skeletal v0.1 source-supported working title 'NCIE-015 — DevSecOps, Infrastructure & Operations Specification' was checked against the NCIE Documentation Suite Master Controlled Register v2.0, Section 3, NCIE-015 entry, per directive item 3 and the skeleton's own Title-control note. The register records the formal title as 'DevSecOps, Infrastructure & Deployment Specification' with Primary Purpose 'Environments, infrastructure, CI/CD, observability, resilience and deployment' — matching this document's actual 36-chapter operational scope exactly. Comparison result: SEMANTIC MATCH — DOCUMENT-CONTROL WORDING DIFFERS ('Deployment' vs. the skeleton's 'Operations'; no material scope discrepancy). The document-control title was accordingly set to 'NCIE-015 — DevSecOps, Infrastructure & Deployment Specification' throughout this document and the deliverable filename; this is recorded as Human Review item HR15-1-1 for institutional confirmation.

Maps each of the 36 approved NCIE-015 Skeletal v0.1 chapters to its expanded v1.0 location, states the authority basis for the expansion, and records the effect on that chapter's Human Review Focus item. No chapter was added, removed, merged, split or renumbered; every approved chapter purpose, Salient Things to Note, principal component, upstream dependency and Human Review focus is substantively represented below, including an explicit Salient Things to Note subsection in all 36 chapters (directive item 78 hard gate).

Human Review Register Reconciliation

36 Human Review items total: 34 items from Chapters 1-34 (one per chapter, mechanically extracted from each chapter's own Human Review Focus bullet text), plus HR15-35-1 (Chapter 35's own item) and HR15-36-1 (Chapter 36's own item) — both defined once and included in the register from the start, per the lessons learned from the NCIE-008 v1.0 correction (register-reconciliation omission) and the NCIE-009 v1.0 correction (Salient Things to Note omission), rather than discovered afterward. Classification breakdown: 17 Institutional Confirmation Required, 9 Security/Sovereignty Confirmation Required, 8 Engineering/Infrastructure Discovery Required, 1 Legal/Policy Confirmation Required, 1 Resolved by Upstream Baseline. 32 Blocking / 4 Non-Blocking. Every NCIE-015 item was individually checked against the existing NCIE-008–014 Human Review registers per directive item 64's upstream-deduplication rule; none was found to restate an identical governance/security/persistence/domain-business question, so no cross-reference deduplication was required for this edition. No item manufactures closure of a decision the approved skeleton, the approved NCIE-008–014 layers, or the approved upstream chain does not itself settle.

Skeleton Fidelity Statement

Every approved Chapter Purpose, Salient Things to Note, Principal Component, Upstream Dependency/Authority and Human Review Focus from the approved NCIE-015 Skeletal v0.1 is substantively represented in the corresponding v1.0 chapter above, including an explicit Salient Things to Note subsection in all 36 chapters — independently re-verified against the final assembled document by a programmatic scan (directive item 78), not assumed from the build script; none is omitted and none is conceptually inverted (Chapter 36 §36.3).
