

NCIE-008

Governance, Authority, Accountability & RACI Specification

**In development — for human review of full expansion —
Version 1.0**

Specifies the institutional governance, authority, accountability and RACI layer over the approved NCIE-001–007 foundation: decision rights, RACI assignment, segregation of duties, policy ownership, Human Review, Agent/model/Tool/VPF governance, exception and emergency authority, audit and traceability.

Governance-only: NCIE-008 assigns institutional authority over approved technical capability; it does not redefine NCIE-001 product scope, NCIE-002 architecture, NCIE-003 canonical data, NCIE-004 engineering baseline, NCIE-005 ARGUS behavior, NCIE-006 Memory & Context architecture or NCIE-007 orchestration.

Expands approved NCIE-008 Skeletal v0.1, itself traced to approved NCIE-001 v1.3, approved NCIE-002 v0.5, approved NCIE-003 v0.4, approved NCIE-004 v1.2, approved NCIE-005 v1.3, approved NCIE-006 v1.2 and approved NCIE-007 v1.2.

Prepared: 05 September 2026

Maintained by: National Communications Intelligence Ecosystem (NCIE)

Document Governance

0.1 Authority Chain

NCIE-001 requirements → NCIE-002 architecture → NCIE-003 canonical data → NCIE-004 engineering baseline → NCIE-005 ARGUS behavioral authority → NCIE-006 Memory & Context architecture → NCIE-007 AI/Agent/Model Orchestration → NCIE-008 Governance, Authority, Accountability & RACI. NCIE-008 assigns institutional governance and human authority over the approved NCIE-001–007 foundation; it implements none of their technical architecture and reinterprets none of their requirements.

0.2 Token-Conservation Convention

Every chapter opens with a short Upstream block citing the specific upstream NCIE-001–007 authority the chapter governs, stating only the governance relationship rather than restating upstream technical content.

0.3 Governing Invariants Register

These 12 invariants bind every chapter of this document and are stated once here rather than re-derived repeatedly. They are fixed by the approved NCIE-008 Skeletal v0.1 and by the approved NCIE-001–007 authority chain; no institutional decision is required to adopt them. Additional invariants already binding from NCIE-005 v1.3, NCIE-006 v1.2 and NCIE-007 v1.2 (ARGUS ≠ institutional decision maker, VALIDATED AI RESULT ≠ INSTITUTIONAL KNOWLEDGE, VPF PASS ≠ KNOWLEDGE PROMOTION, MODEL/AGENT OUTPUT ≠ EVIDENCE, FINDING OR DECISION, AGENT CONTEXT ≠ AGENT AUTHORITY, and others) remain fully in force and are cross-referenced, not restated, in the chapters below.

- HUMAN AUTHORITY ≠ TECHNICAL CAPABILITY.
- TECHNICAL ELIGIBILITY ≠ INSTITUTIONAL AUTHORIZATION.
- AI / AGENT / MODEL / VPF ≠ INSTITUTIONAL DECISION AUTHORITY.
- GATE A PASS ≠ HUMAN APPROVAL.
- GATE B / VPF PASS ≠ HUMAN APPROVAL.
- DELEGATION ≠ AUTHORITY EXPANSION.
- TOOL ACCESS ≠ ACTION AUTHORITY.
- AGENT CONTEXT ≠ AGENT AUTHORITY.
- PROMOTION RECOMMENDATION ≠ REGISTRATION APPROVAL.
- RACI ASSIGNMENT ≠ TECHNICAL ENFORCEMENT.
- EXCEPTION APPROVAL ≠ POLICY REPEAL.
- EMERGENCY SUSPENSION ≠ PERMANENT REVOCATION.

0.4 Governance Scope Note

NCIE-008 is a controlled addition to the approved authority chain: it assigns institutional decision rights, RACI and accountability over capability that NCIE-001–007 already define. Where an institutional choice (an office, a threshold, a quorum, a review period) is not established by an approved source, NCIE-008 states the decision-right class and defers the assignment to Human Review rather than inventing an answer. Approval of the NCIE-008 Skeletal v0.1 authorized this full expansion; it did not itself approve any individual RACI assignment, role mapping, threshold or governance default proposed below.

0.5 Human Review Focus Classification

Every chapter's Human Review Focus item carries one of seven labels: RESOLVED BY UPSTREAM BASELINE; PROPOSED DESIGN DEFAULT; INSTITUTIONAL CONFIRMATION REQUIRED; SECURITY/SOVEREIGNTY CONFIRMATION REQUIRED; LEGAL/POLICY CONFIRMATION REQUIRED; ENGINEERING/INFRASTRUCTURE DISCOVERY REQUIRED; or SOURCE/WORKFLOW DISCOVERY REQUIRED — each additionally marked Blocking or Non-Blocking, and each stating precisely what it blocks rather than implying the whole document is blocked. Chapter 25 consolidates every open item, extracted directly from the chapters so the register cannot drift from its sources (mechanically verified per §25.4).

0.6 Status Convention

Skeletal-structure approval authorizes expansion; it does not approve any individual governance interpretation, RACI assignment, role mapping or threshold below — those remain IN DEVELOPMENT / FOR HUMAN REVIEW until a separate approval act. Nothing in this document may be cited as an approved institutional decision.

0.7 Document Amendment History

Version: v0.1

Change: Approved skeletal review edition (structural/conceptual review only; full expansion not yet authorized).

Version: v1.0

Change: Full expansion of the approved NCIE-008 Skeletal v0.1 into the complete 26-chapter specification per the NCIE-008 v0.1→v1.0 Claude Full-Expansion Production Directive: chapter doctrine, decision-right and RACI matrices, segregation-of-duties matrix, Human Review Register (Chapter 25) and full traceability/handover (Chapter 26).

Authority: Approved NCIE-001 Master PRD v1.3, approved NCIE-002 System Architecture & Technical Design v0.5, approved NCIE-003 Data Model & Data Dictionary v0.4, approved NCIE-004 Technology Stack & Engineering Blueprint v1.2, approved NCIE-005 ARGUS Intelligence Assistant Specification v1.3, approved NCIE-006 Memory & Context Architecture Specification v1.2, approved NCIE-007 AI, Agent & Model Orchestration Specification v1.2, and the approved NCIE-008 Skeletal v0.1.

Scope: Controlled full expansion only — the approved 26-chapter skeletal structure, chapter purposes and boundaries are preserved exactly; no chapter was added, removed, merged, split or renumbered.

Status: v1.0 IN DEVELOPMENT — FOR HUMAN REVIEW OF FULL EXPANSION. The approved v0.1 skeleton remains historically preserved as the approved expansion architecture.

Document	NCIE-008 Governance, Authority, Accountability & RACI Specification
Edition	In development — Version 1.0 (Full Expansion of Approved Skeletal v0.1)
Requirements authority	NCIE-001 Master Product Requirements Document, Version 1.3 — APPROVED
Architecture authority	NCIE-002 System Architecture & Technical Design, Version 0.5 — APPROVED
Canonical data authority	NCIE-003 Data Model & Data Dictionary, Version 0.4 — APPROVED
Engineering baseline	NCIE-004 Technology Stack & Engineering Blueprint, Version 1.2 — APPROVED
ARGUS behavioral authority	NCIE-005 ARGUS Intelligence Assistant Specification, Version 1.3 — APPROVED
Memory & Context authority	NCIE-006 Memory & Context Architecture Specification, Version 1.2 — APPROVED
Orchestration authority	NCIE-007 AI, Agent & Model Orchestration Specification, Version 1.2 — APPROVED
Prior baseline	NCIE-008 Governance, Authority, Accountability & RACI Specification, Skeletal v0.1 — APPROVED FOR FULL EXPANSION (historically preserved)
Status	IN DEVELOPMENT — FOR HUMAN REVIEW OF FULL EXPANSION until explicitly approved; the approved v0.1 skeleton remains historically preserved as the expansion architecture

NCIE-008 — Chapter 1 Expansion

Mandate, Authority Chain & Governance Boundary

Establish NCIE-008 as the institutional governance and human-authority layer over the approved NCIE-001–007 foundation. Governance controls authority over approved capability; it does not create capability, and it does not reinterpret upstream requirements or architecture.

Status: IN DEVELOPMENT — FOR HUMAN REVIEW.

Upstream: NCIE-007 Ch.36 (assigns institutional governance/human authority to NCIE-008); NCIE-002 Ch.4/Ch.24 (Human-Primary doctrine).

1.1 Mandate

NCIE-008 assigns institutional decision rights, accountability and RACI over approved technical capability defined in NCIE-001–007. It governs who may decide, approve, register, suspend, except or accept — not what is technically possible.

1.2 Governance Boundary — What NCIE-008 Does Not Own

NCIE-008 does not own product requirements, system architecture, canonical data, engineering baseline, ARGUS behavior, Memory/Context architecture or AI/Agent/Model orchestration. It owns the institutional authority layer above them.

Table 1. NCIE-008 governance boundary.

Concern	Owned By
Product requirements/scope	NCIE-001
System architecture	NCIE-002
Canonical data model	NCIE-003
Engineering baseline	NCIE-004
ARGUS behavioral authority	NCIE-005
Memory & Context architecture	NCIE-006
AI/Agent/Model orchestration	NCIE-007
Institutional governance, authority, accountability, RACI	NCIE-008 (this document)
Detailed IAM/security engineering	NCIE-009 (downstream)

1.3 Precedence and Contradiction Handling

Where approved NCIE-001–007 directly conflict on a governance question, NCIE-008 does not silently choose between them. The contradiction is recorded and the affected governance requirement is halted for Human Review rather than resolved by inference.

1.R RACI Assignment

Table 2. Chapter 1 RACI.

Governance Function	Accountable	Responsible	Consulted	Informed
Adopt/confirm NCIE-008 governance architecture	Accountable Authority Class (to be assigned)	Governance Programme Owner (to be assigned)	Chapter domain owners (Ch.2–24)	All institutional role holders

Human Review Focus

- [INSTITUTIONAL CONFIRMATION REQUIRED] (Blocking) HR8-1-1: Confirm the acceptance authority for NCIE-008 as a whole and the chapter sign-off authority for each of its 26 chapters.

Traceability: NCIE-007 Ch.36; NCIE-002 Ch.4, Ch.24.

NCIE-008 — Chapter 2 Expansion

Governance Doctrine & Authority Invariants

Lock the principles separating human/institutional authority from AI, Agent, Model, Tool and VPF technical eligibility, and state the governance precedence rules that apply when they interact.

Status: IN DEVELOPMENT — FOR HUMAN REVIEW.

Upstream: Human-Primary doctrine across NCIE-002/005/007; §0.3 Governing Invariants Register.

2.1 Authority Invariants

The 12 invariants in §0.3 bind every chapter without exception. No chapter may state or imply that a Gate pass, Agent success, model confidence, multi-Agent consensus, VPF validation, Tool access, delegation, promotion recommendation, RACI assignment, exception approval or emergency suspension itself constitutes or expands institutional authority.

2.2 Governance Precedence

A Human Review decision, once validly closed under Chapter 9, binds over any technical default or prior practice. Historical approval, historical RACI or past role assignment does not by itself establish current authority where current verification is required (§53 of the production directive; developed fully in Chapter 24's current-authority doctrine).

2.3 Non-Delegable Authority Classes

This edition names no authority class as legally or institutionally non-delegable, because no approved source establishes one. Any such designation is a Human Review decision, not a Claude determination.

2.R RACI Assignment

Table 3. Chapter 2 RACI.

Governance Function	Accountable	Responsible	Consulted	Informed
Maintain/interpret the Governing Invariants Register	Accountable Authority Class (to be assigned)	Governance Programme Owner (to be assigned)	Legal/Policy Function (to be assigned)	All chapter owners

Human Review Focus

- [INSTITUTIONAL CONFIRMATION REQUIRED] (Blocking) HR8-2-1: Confirm whether any authority class described in this document is legally or institutionally non-delegable and, if so, name it.

Traceability: NCIE-002 Ch.4, Ch.24; NCIE-005; NCIE-007 §0.3.

NCIE-008 — Chapter 3 Expansion

Governance Actor & Institutional Role Taxonomy

Define the abstract governance role classes needed for accountability, without inventing named offices, and distinguish institutional role from technical or service identity.

Status: IN DEVELOPMENT — FOR HUMAN REVIEW.

Upstream: NCIE-007 (separates Human Principal from ARGUS, Agent, Model, Tool and Service).

3.1 Role Class Taxonomy

Eight abstract role classes are defined functionally, independent of any actual institutional office: Accountable Authority, Responsible Operator, Reviewer, Approver, Custodian, Owner, Assurance/Audit, and Emergency Authority. Every RACI and decision-right assignment in this document is expressed against these classes.

Table 4. Governance role class taxonomy.

Role Class	Function
Accountable Authority	Bears ultimate answerability for a governance decision or domain
Responsible Operator	Performs or coordinates the day-to-day governed process
Reviewer	Independently examines a matter before a decision is made
Approver	Makes the binding institutional decision on a matter
Custodian	Holds and maintains a governed record, register or artifact
Owner	Holds standing responsibility for a policy, register or domain over time
Assurance/Audit	Independently verifies governance controls operated as specified
Emergency Authority	Holds bounded authority to act under Chapter 22 emergency conditions

3.2 Institutional Role vs Technical Identity

A Human Principal, ARGUS session, Agent, Model or Service identity is never itself a governance role. A governance role is always held by an identified accountable human or institutional function; a technical or service identity can be Informed or can execute a Responsible function but cannot be Accountable or Approver.

Human Review Focus

- [INSTITUTIONAL CONFIRMATION REQUIRED] (Blocking) HR8-3-1: Approve the role taxonomy in §3.1 and confirm the process for later mapping each abstract role class to actual institutional offices.

Traceability: NCIE-007 (Human Principal / ARGUS / Agent / Model / Tool / Service separation).

NCIE-008 — Chapter 4 Expansion

Decision Rights & Authority Classes

Catalogue the distinct institutional decision types exercised across NCIE-001–008 and define how each binds to a target, scope and version, and how it is revoked.

Status: IN DEVELOPMENT — FOR HUMAN REVIEW.

Upstream: NCIE-005/007 (separate Human Approval from Gate/VPF states); NCIE-006 (separates prior decisions from current action authority).

4.1 Decision-Right Catalogue

Eleven decision classes are distinguished: Approval, Authorization, Acceptance, Registration, Suspension, Exception, Publication, Knowledge Promotion, Finding, Decision, and Consequential Action. Each is a separate institutional act; none may be inferred from another.

4.2 Validity, Binding and Revocation

Every decision-right act binds to a specific target, scope and version; it does not automatically extend to a later version, a broader scope or an unrelated target. Revocation ends validity prospectively; it does not erase the historical record that the decision existed (§52 governance provenance, developed in Chapter 23).

4.R RACI Assignment

Table 5. Consolidated Decision-Right Matrix (directive item 47).

Decision Class	Accountabl e Authority Class	Responsibl e Process Role	Consultation/Informati on	SoD Constrai nt	Authoritative Evidence	Huma n Review Status
Approval	Accountabl e Authority	Responsibl e Operator	Reviewer (consulted)	Approver ≠ proposer	Governed decision record	Holder — Huma n Review
Authorizatio n	Accountabl e Authority	Responsibl e Operator	Custodian (informed)	Approver ≠ requester	Governed decision record	Holder — Huma n Review
Acceptance	Accountabl e Authority	Reviewer	Owner (consulted)	Approver ≠ author	Sign-off evidence (Ch.10)	Holder — Huma n Review
Registration	Accountabl e Authority	Reviewer + Approver (separate)	Owner (informed)	Proposer ≠ approver (Ch.11)	Registry decision record	Holder — Huma n Review
Suspension	Emergency	Responsibl	Assurance/Audit	Actor ≠	Suspension record	Holder

	Authority / Accountable Authority	Operator	(informed)	sole reinstating authority	(Ch.22)	— Human Review
Exception	Accountable Authority	Reviewer	Assurance/Audit (consulted)	Approver ≠ requester	Exception register (Ch.21)	Holder — Human Review
Publication	Owner	Responsible Operator	Reviewer (consulted)	Approver ≠ author	Governed decision record	Holder — Human Review
Knowledge Promotion	Accountable Authority	Reviewer	Custodian (informed)	Approver ≠ VPF validator (Ch.15/16)	Promotion decision record	Holder — Human Review
Finding	Accountable Authority	Reviewer	Assurance/Audit (consulted)	Finder ≠ sole approver	Evidentiary record (Ch.18)	Holder — Human Review
Decision	Accountable Authority	Reviewer	Assurance/Audit (informed)	Decision- maker ≠ sole evidence source	Evidentiary record (Ch.18)	Holder — Human Review
Consequential Action	Accountable Authority	Responsible Operator	Custodian (informed)	Approver ≠ executor (Ch.14)	Execution/reconciliation record	Holder — Human Review

Human Review Focus

- [INSTITUTIONAL CONFIRMATION REQUIRED] (Blocking) HR8-4-1: Assign the accountable authority holder for each decision-right class in Table 5.

Traceability: NCIE-005 Ch. (Human Approval boundary); NCIE-006 (current-authority doctrine); NCIE-007 Gate A/Gate B.

NCIE-008 — Chapter 5 Expansion

RACI Model & Assignment Rules

Define how Responsible, Accountable, Consulted and Informed assignments operate across every governance function in this document, and the rules governing acting arrangements, vacancy and evidence.

Status: IN DEVELOPMENT — FOR HUMAN REVIEW.

Upstream: NCIE-007 (leaves acceptance/governance ownership to NCIE-008).

5.1 RACI Semantics

Responsible performs the work; Accountable bears ultimate answerability and is exactly one role per function; Consulted is engaged before the decision; Informed is notified after. RACI assignment does not itself perform technical enforcement — enforcement remains with the owning specification (invariant: RACI ASSIGNMENT ≠ TECHNICAL ENFORCEMENT).

5.2 Acting/Deputy Arrangements and Vacancy

A deputy may act for an Accountable or Approver role only under a recorded, time-boxed deputisation. A vacancy in an Accountable role suspends the dependent decision right until the role is filled or a deputy is authorized; it does not pass accountability by default to whoever acts.

5.3 Evidence of Assignment

Every RACI assignment must be evidenced by a governed record binding role, holder, scope and effective date. Prior practice, informal custom or the assumption that someone "usually" holds a role does not constitute evidence of current assignment.

5.R RACI Assignment

Table 6. Chapter 5 RACI.

Governance Function	Accountable	Responsible	Consulted	Informed
Approve/modify a RACI assignment	Accountable Authority Class (to be assigned)	Governance Programme Owner (to be assigned)	Affected chapter/domain owner	Assurance/Audit

Human Review Focus

- [INSTITUTIONAL CONFIRMATION REQUIRED] (Blocking) HR8-5-1: Approve the RACI semantics stated in §5.1 and confirm whether any governance domain may permit shared (multi-holder) accountability as an exception to single-Accountable.

Traceability: NCIE-007 (defers acceptance/governance ownership to NCIE-008).

NCIE-008 — Chapter 6 Expansion

Segregation of Duties & Conflict of Interest

Prevent incompatible proposal, approval, execution and assurance functions from collapsing into one actor where risk requires separation, and define conflict-of-interest handling.

Status: IN DEVELOPMENT — FOR HUMAN REVIEW.

Upstream: NCIE-007 (leaves model approval and emergency suspension authority for institutional confirmation).

6.1 Incompatible-Duty Principle

The same accountable individual or role may not simultaneously propose and approve, approve and execute, or execute and provide assurance over the same consequential action, absent an approved emergency exception under §6.3.

6.2 Reviewer Independence and Recusal

A reviewer or approver must not have proposed or executed the matter under review, and must not hold a material interest in its outcome. A conflict requires recusal and reassignment to an independent holder of the same role class; technical access to perform a function does not waive this separation.

6.3 Emergency Compensating Controls

Where duties must be temporarily combined under Chapter 22 emergency conditions, a compensating control — an independent post-event review — is mandatory before the combined-duty action can be treated as closed.

6.R RACI Assignment

Table 7. Consolidated Segregation-of-Duties Matrix (directive item 48).

Incompatible Function Pair	Risk Domain	Prohibited Combination	Compensating Control	Human Review Status
Propose vs Approve	Policy (Ch.7)	Same holder proposes and approves the same policy change	Independent Approver role	Holder — Human Review
Approve vs Execute	Consequential Action (Ch.14)	Same holder approves and executes the same action	Dual-control execution	Holder — Human Review
Execute vs Assure	Consequential Action (Ch.14/23)	Same holder executes and provides assurance over the same action	Independent Assurance/Audit review	Holder — Human Review
Promote vs Register	Agent Governance (Ch.11)	Same holder recommends promotion and approves registration	Separate Registry Approver	Holder — Human Review
Approve vs Suspend	Model Governance (Ch.13)	Same holder approves and later suspends the same model without independent trigger review	Independent trigger confirmation	Holder — Human Review

Validate (VPF) vs Approve (Knowledge)	VPF/Knowledge (Ch.15/16)	VPF validator role also approves Knowledge promotion of the same artifact	Separate Knowledge Approver	Holder — Human Review
Grant Exception vs Audit Exception	Exception Governance (Ch.21/23)	Same holder grants and audits the same exception	Independent Assurance/Audit review	Holder — Human Review

Human Review Focus

- [INSTITUTIONAL CONFIRMATION REQUIRED] (Blocking) HR8-6-1: Approve the initial Segregation-of-Duties Matrix in Table 7 and confirm which incompatible-duty pairs require a named independent reviewer pool rather than a single reassigned reviewer.

Traceability: NCIE-007 (model approval / emergency suspension authority left for institutional confirmation).

NCIE-008 — Chapter 7 Expansion

Policy Ownership, Approval & Lifecycle

Define institutional ownership of the policies constraining models, agents, tools, VPF, Memory/Context and ARGUS, and their governed lifecycle.

Status: IN DEVELOPMENT — FOR HUMAN REVIEW.

Upstream: NCIE-001–007 (expose governed policy states but do not assign every owner).

7.1 Policy Governance Lifecycle

Every policy family has exactly one accountable Owner and passes through proposal, review, approval, effective date, supersession, exception and retirement, with full history preserved. An emergency amendment (Chapter 22) still requires post-event review before it may be treated as a standing policy change.

7.2 Policy Families Requiring an Owner

The policy families below are exposed by NCIE-001–007 as governed but institutionally unassigned; each requires a confirmed Owner before its governing policy can be treated as authoritative.

Table 8. Policy families pending ownership.

Policy Family	Constrains	Candidate Owner Class	Status
Model approval policy	NCIE-007 Model Gateway/Registry	Accountable Authority (Ch.13)	Holder — Human Review
Agent promotion policy	NCIE-007 Agent Factory/Registry	Accountable Authority (Ch.11)	Holder — Human Review
Tool/consequential-action policy	NCIE-007 Tool Gateway	Accountable Authority (Ch.14)	Holder — Human Review
VPF disposition policy	NCIE-007 VPF Validation Framework	Accountable Authority (Ch.15)	Holder — Human Review
Memory/Context retention policy	NCIE-006 Memory & Context Architecture	Accountable Authority (Ch.17)	Holder — Human Review
ARGUS governance-routing policy	NCIE-005 ARGUS behavior	Accountable Authority (Ch.19)	Holder — Human Review
Exception/emergency policy	Chapters 21–22	Accountable Authority / Emergency Authority	Holder — Human Review

7.R RACI Assignment

Table 9. Chapter 7 RACI.

Governance Function	Accountable	Responsible	Consulted	Informed
Approve a policy or policy amendment	Owner (to be assigned)	Responsible Operator (to be assigned)	Reviewer	Assurance/Audit

Human Review Focus

- [INSTITUTIONAL CONFIRMATION REQUIRED] (Blocking) HR8-7-1: Map each policy family in Table 8 to a confirmed accountable institutional Owner.

Traceability: NCIE-001–007 (governed policy states exposed without full owner assignment).

NCIE-008 — Chapter 8 Expansion

Risk Classification & Governance Tiering

Define governance risk/consequence tiers that determine review intensity, layered on top of — and never replacing — upstream technical risk classification.

Status: IN DEVELOPMENT — FOR HUMAN REVIEW.

Upstream: NCIE-007 (classification/purpose/task-aware eligibility and Human Review classifications).

8.1 Governance Tiers

Three governance-path tiers are proposed as a default: Tier 1 Standard Review, Tier 2 Enhanced Review, and Tier 3 Prohibited-Except-By-Exception. These are governance-process categories distinct from NCIE-007's technical eligibility/classification scoring; a governance tier determines how a matter is reviewed, not whether it is technically eligible.

8.2 Tier Assignment and Escalation

Tier assignment and escalation between tiers is itself a Chapter 4 decision right. A governance tier can require additional review or exception handling; it cannot override upstream technical eligibility or safety controls (HUMAN AUTHORITY ≠ TECHNICAL CAPABILITY; TECHNICAL ELIGIBILITY ≠ INSTITUTIONAL AUTHORIZATION).

8.R RACI Assignment

Table 10. Chapter 8 RACI.

Governance Function	Accountable	Responsible	Consulted	Informed
Assign or change a governance tier	Accountable Authority Class (to be assigned)	Responsible Operator (to be assigned)	Reviewer	Assurance/Audit

Human Review Focus

- [PROPOSED DESIGN DEFAULT] (Non-Blocking) HR8-8-1: Adopt the proposed three-tier governance taxonomy in 88.1 as a working default pending confirmation of the tier-to-domain mapping; does not block chapter-level governance operation in the interim.

Traceability: NCIE-007 (classification/purpose/task-aware eligibility, Human Review classifications).

NCIE-008 — Chapter 9 Expansion

Human Review Framework

Specify the institutional process for HUMAN_REVIEW_REQUIRED and other review states: intake, reviewer qualification, evidence package, outcomes, dissent, recusal, provenance, validity, escalation and closure.

Status: IN DEVELOPMENT — FOR HUMAN REVIEW.

Upstream: NCIE-007 (keeps Human Review separate from VPF and refers authority to NCIE-008).

9.1 Review Lifecycle

A review proceeds through intake, reviewer assignment, evidence-package assembly, deliberation, outcome (Approved, Conditionally Approved, Rejected, or Returned for Further Work), dissent recording where applicable, and closure. Review does not rewrite the original VPF disposition it examines — it adds an institutional decision layered on top of it.

9.2 Reviewer Qualification and Independence

A reviewer must hold the Reviewer or Approver role class (Chapter 3) applicable to the matter and must satisfy the Chapter 6 segregation-of-duties constraints. Reviewer qualification pools remain Human Review pending institutional mapping.

9.3 Provenance and Validity

Every Human Review outcome is evidenced by a governed record binding reviewer identity, target, scope and time. Validity does not survive supersession by a later review of the same target and scope; a superseded outcome remains historically preserved, not deleted.

9.R RACI Assignment

Table 11. Chapter 9 RACI.

Governance Function	Accountable	Responsible	Consulted	Informed
Conduct/close a Human Review	Approver (to be assigned)	Reviewer (to be assigned)	Domain Accountable Authority	Assurance/Audit

Human Review Focus

- [INSTITUTIONAL CONFIRMATION REQUIRED] (Blocking) HR8-9-1: Assign reviewer pools/authorities for Human Review and confirm which review classes are mandatory versus advisory.

Traceability: NCIE-007 (keeps Human Review separate from VPF; refers ownership authority to NCIE-008).

NCIE-008 — Chapter 10 Expansion

Approval, Confirmation & Acceptance Authority

Define who may approve consequential actions, specifications and releases, and grant institutional acceptance of a deliverable.

Status: IN DEVELOPMENT — FOR HUMAN REVIEW.

Upstream: NCIE-007 (Human Review asks for acceptance authority and chapter sign-off authority).

10.1 Approval Classes

Approval binds to a specific target, scope and version. Prior approval of an earlier version is not blanket authority over a later one, and technical success — a Gate pass or a VPF PASS — is never itself an approval (GATE A PASS ≠ HUMAN APPROVAL; GATE B / VPF PASS ≠ HUMAN APPROVAL).

10.2 Conditional Approval, Rejection, Withdrawal and Reapproval

A conditional approval states its conditions precedent explicitly; it is not effective until they are satisfied. Rejection and withdrawal end the pending act. A material change to target, scope or version after approval triggers mandatory reapproval rather than continued reliance on the prior act.

10.3 Sign-off Evidence

Authoritative sign-off evidence binds approver identity and role, target, scope, version, decision and time. Generated prose describing an approval is never itself proof that the approval occurred.

10.R RACI Assignment

Table 12. Chapter 10 RACI.

Governance Function	Accountable	Responsible	Consulted	Informed
Approve a specification, release or acceptance	Accountable Authority Class (to be assigned)	Reviewer (to be assigned)	Owner	Assurance/Audit

Human Review Focus

- [INSTITUTIONAL CONFIRMATION REQUIRED] (Blocking) HR8-10-1: Determine the acceptance authorities for each NCIE-series document and for operational capability releases, including chapter-level sign-off authority.

Traceability: NCIE-007 (Human Review asks for acceptance authority and chapter sign-off authority).

NCIE-008 — Chapter 11 Expansion

Agent Governance — Registration, Promotion & Reuse

Govern Registered Reusable Agents and Promotion Candidates: proposer/evaluator/approver separation, Registry interface, restrictions, periodic review, suspension and retirement.

Status: IN DEVELOPMENT — FOR HUMAN REVIEW.

Upstream: NCIE-007 (promotion lifecycle and self-registration prohibition).

11.1 Promotion and Registration Separation

Promotion recommendation, evaluation and registration approval are held by distinct roles under the Chapter 6 segregation-of-duties matrix. A promotion recommendation is a Responsible-level act; only a confirmed Approver may register an Agent as reusable.

11.2 Registry Interface and Restrictions

Registry mutation is restricted to an approved Registry Authority. Registered Agents are subject to periodic review and may be suspended or retired through the Chapter 4 decision-right process.

11.3 Self-Registration Prohibition

An Agent cannot register or promote itself. A successful Ephemeral run or a favorable VPF disposition is a promotion recommendation input only — PROMOTION RECOMMENDATION ≠ REGISTRATION APPROVAL.

11.R RACI Assignment

Table 13. Chapter 11 RACI.

Governance Function	Accountable	Responsible	Consulted	Informed
Register/promote a reusable Agent	Registry Authority (to be assigned)	Promotion Evaluator (to be assigned)	Domain Owner	Assurance/Audit

Human Review Focus

- [INSTITUTIONAL CONFIRMATION REQUIRED] (Blocking) HR8-11-1: Assign Agent promotion/registration authority and confirm the composition of the promotion review panel.

Traceability: NCIE-007 (Agent promotion lifecycle, self-registration prohibition).

NCIE-008 — Chapter 12 Expansion

Dynamic & Ephemeral Agent Governance

Define standing versus case-specific governance for Dynamic/Ephemeral Agents, high-risk escalation, expiry, promotion triggers, the recursive-synthesis boundary and Engineering Change Candidate handoff.

Status: IN DEVELOPMENT — FOR HUMAN REVIEW.

Upstream: NCIE-007 (Dynamic Agent doctrine); NCIE-006 (Agent Context boundaries).

12.1 Standing vs Case-Specific Governance

Lower-risk, already-approved Dynamic Agent synthesis classes may operate under standing governance approval. Higher-risk classes require case-specific escalation before synthesis proceeds; the escalation threshold between the two is an institutional decision.

12.2 Expiry, Promotion Trigger and Recursive-Synthesis Boundary

Ephemeral Agents expire per the NCIE-007 lifecycle. Repeated reuse of the same pattern triggers a Chapter 11 Promotion Candidate review — it does not create automatic promotion. Recursive synthesis remains disabled by default; the decision not to enable it is itself preserved as a Human Review outcome, not a silent default (AGENT SYNTHESIS ≠ SELF-REGISTRATION; SYNTHESIZED AGENT ≠ AGENT-FACTORY AUTHORITY).

12.3 Engineering Change Candidate Handoff

Where Dynamic Agent Synthesis reveals a missing engineering primitive, the gap is handed to the NCIE-004 Engineering Change Candidate process — it is never resolved by further synthesis attempting to fabricate the missing capability.

12.R RACI Assignment

Table 14. Chapter 12 RACI.

Governance Function	Accountable	Responsible	Consulted	Informed
Approve/escalate a Dynamic Agent synthesis class	Accountable Authority Class (to be assigned)	Responsible Operator (to be assigned)	Engineering Change Owner (NCIE-004)	Assurance/Audit

Human Review Focus

- [INSTITUTIONAL CONFIRMATION REQUIRED] (Blocking) HR8-12-1: Confirm which Dynamic Agent classes may operate under standing versus case-specific approval, and the escalation threshold between them.

Traceability: NCIE-007 (Dynamic Agent doctrine); NCIE-006 (Agent Context boundaries).

NCIE-008 — Chapter 13 Expansion

Model Governance & Model Approval Authority

Govern model and provider approval, use-case restriction, suspension, emergency suspension, re-evaluation and retirement.

Status: IN DEVELOPMENT — FOR HUMAN REVIEW.

Upstream: NCIE-007 (leaves model-approval and emergency model/agent suspension authority unresolved).

13.1 Model and Provider Approval Scope

Approval binds to a specific model version and an explicit use-case scope. A model being technically available through the Model Gateway does not make it institutionally eligible for a given use (MODEL AVAILABILITY ≠ MODEL ELIGIBILITY, inherited from NCIE-007).

13.2 Suspension, Emergency Suspension and Retirement

Ordinary suspension and retirement follow the Chapter 4/Chapter 9 decision-right and review process. Emergency suspension follows the Chapter 22 emergency-authority process — bounded, traceable and subject to mandatory post-event review before any permanent disposition.

13.R RACI Assignment

Table 15. Chapter 13 RACI.

Governance Function	Accountable	Responsible	Consulted	Informed
Approve/suspend/retire a model or provider	Accountable Authority Class (to be assigned)	Responsible Operator (to be assigned)	Emergency Authority (for suspension)	Assurance/Audit

Human Review Focus

- [INSTITUTIONAL CONFIRMATION REQUIRED] (Blocking) HR8-13-1: Assign model/provider approval authority and emergency model-suspension authority.
- Traceability: NCIE-007 (model-approval and emergency suspension authority left unresolved).

NCIE-008 — Chapter 14 Expansion

Tool & Consequential Action Governance

Govern Tool classes and consequential-action authority separately from technical capability: approval classes, dual control, emergency stop, execution/reconciliation ownership and OUTCOME UNKNOWN governance.

Status: IN DEVELOPMENT — FOR HUMAN REVIEW.

Upstream: NCIE-007 (Tool Gateway / Human Approval boundaries).

14.1 Tool Class and Consequential-Action Governance

TOOL ACCESS ≠ ACTION AUTHORITY. Proposal, approval, submission, verified execution and any institutional Decision built on the result remain five distinct acts, each traced to the Chapter 4 Consequential Action decision-right class.

14.2 Dual Control and Emergency Stop

High-consequence actions require dual control: the Approver may not be the executor (Chapter 6). An emergency stop is available under the Chapter 22 emergency-authority process where a consequential action must be halted before completion.

14.3 OUTCOME UNKNOWN Governance

Where a consequential action's outcome cannot be confirmed, it is governed as OUTCOME UNKNOWN pending reconciliation. It is never assumed successful, never assumed reversed, and never resubmitted by default without an explicit reconciliation decision.

14.R RACI Assignment

Table 16. Chapter 14 RACI.

Governance Function	Accountable	Responsible	Consulted	Informed
Approve a consequential-action class or threshold	Accountable Authority Class (to be assigned)	Responsible Operator (to be assigned)	Reviewer	Assurance/Audit

Human Review Focus

- [INSTITUTIONAL CONFIRMATION REQUIRED] (Blocking) HR8-14-1: Approve consequential-action classes and any associated monetary or operational thresholds; no threshold is adopted by default absent a sourced institutional decision.

Traceability: NCIE-007 (Tool Gateway / Human Approval boundaries).

NCIE-008 — Chapter 15 Expansion

VPF Governance & Validation Authority

Define governance ownership of VPF profiles, validators, disposition policy, Human Review routing, suspension, revalidation and assurance.

Status: IN DEVELOPMENT — FOR HUMAN REVIEW.

Upstream: NCIE-007 v1.2 VPF architecture.

15.1 VPF Policy and Profile Ownership

VPF validates AI artifacts; it does not approve Decisions, Findings or Institutional Knowledge (GATE B / VPF PASS ≠ HUMAN APPROVAL). Policy and profile ownership sits with a confirmed Accountable Authority, distinct from the technical validator implementation.

15.2 Validator Governance and Disposition Routing

Validator approval, validator suspension, and HUMAN_REVIEW_REQUIRED routing are distinct governed acts, each traceable to the Chapter 4 catalogue. VALIDATION_UNAVAILABLE is never treated as PASS by governance any more than by the technical validator (no fail-open).

15.3 Revalidation, Invalidation and Historical Preservation

Revalidation may change an artifact's current disposition; it does not rewrite the historical record of an earlier disposition (REVALIDATION ≠ HISTORICAL REWRITE, inherited from NCIE-007 §26.9).

15.R RACI Assignment

Table 17. Chapter 15 RACI.

Governance Function	Accountable	Responsible	Consulted	Informed
Own VPF policy/profile; own HUMAN_REVIEW_REQUIRED disposition	Accountable Authority Class (to be assigned)	Validator Governance Operator (to be assigned)	Reviewer	Assurance/Audit

Human Review Focus

- [INSTITUTIONAL CONFIRMATION REQUIRED] (Blocking) HR8-15-1: Assign VPF policy/profile authority and ownership of the HUMAN_REVIEW_REQUIRED disposition.

Traceability: NCIE-007 v1.2 VPF Validation Framework.

NCIE-008 — Chapter 16 Expansion

Institutional Knowledge Promotion Governance

Govern the promotion of eligible artifacts into Institutional Knowledge, and their retraction or supersession.

Status: IN DEVELOPMENT — FOR HUMAN REVIEW.

Upstream: NCIE-006/007 (preserve a separate Knowledge lifecycle).

16.1 Promotion Governance

A Validated AI Result is not Institutional Knowledge until an accountable holder promotes it (VALIDATED AI RESULT ≠ INSTITUTIONAL KNOWLEDGE; VPF PASS ≠ KNOWLEDGE PROMOTION). The Chapter 6 segregation-of-duties matrix keeps the VPF validator role separate from the Knowledge Promotion approver role.

16.2 Sponsorship, Review and Provenance

A promotion candidate is sponsored, independently reviewed and approved; the original AI-generated provenance is preserved alongside the promotion record rather than replaced by it.

16.3 Retraction and Supersession

Retraction or supersession of promoted Knowledge is itself a governed decision-right act; it does not erase the historical fact that the Knowledge was once promoted, nor the reason for its retraction.

16.R RACI Assignment

Table 18. Chapter 16 RACI.

Governance Function	Accountable	Responsible	Consulted	Informed
Promote/retract Institutional Knowledge	Accountable Authority Class (to be assigned)	Candidate Sponsor (to be assigned)	Reviewer (≠ VPF validator)	Custodian

Human Review Focus

- [INSTITUTIONAL CONFIRMATION REQUIRED] (Blocking) HR8-16-1: Assign Knowledge promotion and retraction authority, distinct from VPF validator authority.

Traceability: NCIE-006/007 (Knowledge lifecycle kept separate from VPF/Validated AI Result).

NCIE-008 — Chapter 17 Expansion

Memory & Context Governance

Assign governance over Memory/Context policy — retention authority, Agent Context governance and cross-context exceptions — without redefining NCIE-006 architecture.

Status: IN DEVELOPMENT — FOR HUMAN REVIEW.

Upstream: NCIE-006 v1.2 is the Memory & Context authority.

17.1 Retention and Agent Context Governance

Retention periods, minimum-necessary bounding and provider-native memory governance remain NCIE-006 technical architecture; NCIE-008 assigns the accountable institutional owner of the retention policy and of exceptions to it. AGENT CONTEXT ≠ AGENT AUTHORITY; remembered authorization never substitutes for current authorization.

17.2 Cross-Context Exceptions

A cross-context exception (allowing Context normally isolated to one Run or Agent to be shared) is a Chapter 21 exception act — it requires an accountable approver, a stated scope and an expiry, and it cannot be granted by an Agent or ARGUS itself.

17.R RACI Assignment

Table 19. Chapter 17 RACI.

Governance Function	Accountable	Responsible	Consulted	Informed
Own Memory/Context retention policy; approve cross-context exceptions	Accountable Authority Class (to be assigned)	Memory Policy Operator (to be assigned)	NCIE-006 domain owner	Assurance/Audit

Human Review Focus

- [INSTITUTIONAL CONFIRMATION REQUIRED] (Blocking) HR8-17-1: Assign governance ownership for Agent Context retention policy and for cross-context exception approval.

Traceability: NCIE-006 v1.2 (Memory & Context Architecture Specification).

NCIE-008 — Chapter 18 Expansion

Evidence, Findings & Decision Governance

Preserve human and institutional authority over formal Findings and Decisions, including dissent, correction, retraction and provenance.

Status: IN DEVELOPMENT — FOR HUMAN REVIEW.

Upstream: NCIE-007 skeletal invariants and canonical Evidence boundaries.

18.1 Finding and Decision Authority

MODEL/AGENT OUTPUT ≠ EVIDENCE, FINDING OR DECISION. A model or Agent output may inform a Finding or Decision; it becomes one only when an accountable holder issues it as such through the Chapter 4 decision-right process.

18.2 Evidentiary Review and Dissent

A Finding or Decision requires evidentiary review distinct from the AI/Agent output it may consider. Dissent from a reviewer is preserved in the record rather than silently overwritten by a majority or by ARGUS-presented consensus (AGENT CONSENSUS ≠ INSTITUTIONAL TRUTH).

18.3 Correction, Retraction and Provenance

A Finding or Decision may later be corrected or retracted through the same decision-right process that issued it; the original record and its provenance are preserved historically, not deleted.

18.R RACI Assignment

Table 20. Chapter 18 RACI.

Governance Function	Accountable	Responsible	Consulted	Informed
Issue/correct/retract a Finding or Decision	Accountable Authority Class (to be assigned)	Reviewer (to be assigned)	Assurance/Audit	Affected domain owner

Human Review Focus

- [LEGAL/POLICY CONFIRMATION REQUIRED] (Blocking) HR8-18-1: Confirm the institutional authorities empowered to issue formal Findings and Decisions, including any legal or policy prerequisites for their evidentiary weight.

Traceability: NCIE-007 skeletal invariants; canonical Evidence/Finding/Decision boundaries.

NCIE-008 — Chapter 19 Expansion

ARGUS Governance Boundary

Define governance states ARGUS may present or route without making ARGUS itself a governance authority, and specify prohibited representations.

Status: IN DEVELOPMENT — FOR HUMAN REVIEW.

Upstream: NCIE-005 behavioral authority; NCIE-007 orchestration boundary.

19.1 ARGUS Governance Policy

ARGUS may present governance state (e.g., that an item is HUMAN_REVIEW_REQUIRED, that an approval is pending, or that an exception is expiring) and may route a matter to the correct reviewer or approver. ARGUS cannot grant authority, cannot self-clear a Human Review item, and cannot represent its own output as an institutional Decision.

19.2 Prohibited Representations and Escalation

ARGUS must not phrase a Gate pass, VPF PASS or Agent success as approval, and must escalate ambiguous governance states to a human reviewer rather than infer an outcome. Detailed conversational UX for these representations is downstream (NCIE-012).

19.R RACI Assignment

Table 21. Chapter 19 RACI.

Governance Function	Accountable	Responsible	Consulted	Informed
Define/approve ARGUS governance-routing policy	Accountable Authority Class (to be assigned)	NCIE-005 behavioral owner (to be assigned)	Reviewer	Assurance/Audit

Human Review Focus

- [INSTITUTIONAL CONFIRMATION REQUIRED] (Non-Blocking) HR8-19-1: Confirm which governance actions ARGUS may route automatically versus require explicit human initiation; does not block core governance operation pending confirmation.

Traceability: NCIE-005 (ARGUS behavioral authority); NCIE-007 (orchestration boundary).

NCIE-008 — Chapter 20 Expansion

Security, Privacy & Sovereignty Governance Interface

Define governance decisions interfacing with NCIE-009 security engineering and with privacy, residency and sovereignty controls, without preempting detailed security engineering.

Status: IN DEVELOPMENT — FOR HUMAN REVIEW.

Upstream: NCIE-007 (assigns IAM/security engineering to NCIE-009; uses classification/residency/retention in eligibility).

20.1 Security and Privacy Governance Ownership

NCIE-008 assigns who decides — privileged access approval, break-glass authorization, privacy disclosure approval, residency and sovereignty exception approval — while NCIE-009 owns how those decisions are technically enforced.

20.2 Break-Glass and Residency/Sovereignty Exceptions

A break-glass action is governed as an emergency act under Chapter 22, requiring post-event review. A residency or sovereignty exception follows the Chapter 21 exception process and cannot itself relax a security control that NCIE-009 has not approved to relax.

20.R RACI Assignment

Table 22. Chapter 20 RACI.

Governance Function	Accountable	Responsible	Consulted	Informed
Approve privileged access/break-glass/residency exception	Accountable Authority Class (to be assigned)	NCIE-009 security operator (to be assigned)	Privacy/Disclosure owner	Assurance/Audit

Human Review Focus

- [SECURITY/SOVEREIGNTY CONFIRMATION REQUIRED] (Blocking) HR8-20-1: Confirm the institutional authorities for privileged-access approval, break-glass authorization, and residency/sovereignty exception approval.

Traceability: NCIE-007 (IAM/security assigned to NCIE-009); NCIE-009 (downstream, not preempted).

NCIE-008 — Chapter 21 Expansion

Exception, Waiver & Risk-Acceptance Governance

Define the controlled lifecycle of exceptions, waivers and risk acceptance: request, assessment, authority, compensating controls, scope, expiry, renewal, revocation and audit.

Status: IN DEVELOPMENT — FOR HUMAN REVIEW.

Upstream: Upstream documents preserve current-authorization and controlled-exception boundaries.

21.1 Exception Lifecycle

An exception request states its scope, duration and compensating controls; an accountable approver — never the requester — grants or denies it (Chapter 6). EXCEPTION APPROVAL ≠ POLICY REPEAL: an exception does not change the underlying policy, and it cannot fabricate a technical capability the system does not have.

21.2 Expiry, Renewal, Revocation and Prohibited Exceptions

Every exception has a stated expiry; renewal requires a fresh assessment, not automatic rollover. An exception may be revoked prospectively at any time; certain classes (to be confirmed) may be designated prohibited-exception classes that no approval can override.

21.R RACI Assignment

Table 23. Chapter 21 RACI.

Governance Function	Accountable	Responsible	Consulted	Informed
Grant/renew/revoke an exception or waiver	Accountable Authority Class (to be assigned)	Reviewer (to be assigned)	Assurance/Audit (independent of grantor, Ch.6)	Domain owner

Human Review Focus

- [INSTITUTIONAL CONFIRMATION REQUIRED] (Blocking) HR8-21-1: Assign exception/risk-acceptance authorities and confirm any prohibited-exception classes that no approval may override.

Traceability: Upstream NCIE-001–007 current-authorization and controlled-exception boundaries.

Emergency Authority, Suspension & Kill-Switch Governance

Define temporary emergency authority for suspension and containment of models, agents, tools or sessions, without converting it into permanent governance change.

Status: IN DEVELOPMENT — FOR HUMAN REVIEW.

Upstream: NCIE-007 (leaves emergency model/agent suspension authority unresolved).

22.1 Emergency Trigger and Scope

An Emergency Authority may trigger a bounded, scoped suspension or containment action on a specified target (model, Agent, Tool class or session) for safety, security or integrity reasons. EMERGENCY SUSPENSION ≠ PERMANENT REVOCATION: the action is temporary by construction.

22.2 Traceability, Notification and Post-Event Review

Every emergency action is logged with actor, target, scope, trigger and time, and triggers mandatory notification to the affected domain's Accountable Authority. An independent post-event review — never the acting Emergency Authority alone — determines reinstatement or permanent disposition (Chapter 6 compensating control).

22.R RACI Assignment

Table 24. Chapter 22 RACI.

Governance Function	Accountable	Responsible	Consulted	Informed
Trigger/reinstate an emergency suspension	Emergency Authority (to be assigned)	Responsible Operator (to be assigned)	Domain Accountable Authority (post-event)	Assurance/Audit

Human Review Focus

- [INSTITUTIONAL CONFIRMATION REQUIRED] (Blocking) HR8-22-1: Assign emergency-suspension authority and the independent post-event review authority for each in-scope target class.

Traceability: NCIE-007 (emergency model/agent suspension authority left unresolved).

NCIE-008 — Chapter 23 Expansion

Audit, Assurance, Compliance & Governance Evidence

Define the evidence needed to prove governance decisions occurred as specified, and the independent assurance function that verifies it.

Status: IN DEVELOPMENT — FOR HUMAN REVIEW.

Upstream: NCIE-003/006/007 (preserve provenance/audit distinctions).

23.1 Governance Evidence Classes

Decision records, RACI assignment evidence, approval sign-off receipts, the exception register (Chapter 21), review evidence (Chapter 9) and emergency-action records (Chapter 22) together form the governance evidence base. Historical governance decisions are preserved; a later revocation or supersession does not rewrite the historical fact that an earlier decision existed (§52 governance provenance).

23.2 Independent Assurance and Remediation

Assurance/Audit review is held independent of the roles it reviews (Chapter 6). Findings from assurance review are tracked to remediation through the same decision-right process as any other governance Finding (Chapter 18), not resolved informally.

23.R RACI Assignment

Table 25. Chapter 23 RACI.

Governance Function	Accountable	Responsible	Consulted	Informed
Conduct governance assurance/audit; track remediation	Assurance/Audit (to be assigned)	Responsible Operator (to be assigned)	Reviewed domain owner	Accountable Authority

Human Review Focus

- [INSTITUTIONAL CONFIRMATION REQUIRED] (Non-Blocking) HR8-23-1: Approve the independence model and escalation/reporting route for governance assurance and audit; does not block chapter-level governance operation pending confirmation.

Traceability: NCIE-003/006/007 (provenance and audit distinctions preserved upstream).

NCIE-008 — Chapter 24 Expansion

Governance Change Control, Review Cadence & Versioning

Define the controlled evolution of NCIE-008 itself and of the governance assignments it makes: proposal, impact assessment, approval, effective date, supersession, periodic review, emergency change and historical preservation.

Status: IN DEVELOPMENT — FOR HUMAN REVIEW.

Upstream: NCIE controlled-document conventions and the current approved authority chain.

24.1 Governance Change Lifecycle

A change to this document or to a governance assignment made under it follows the same proposal, impact assessment, approval and effective-date discipline as a policy change (Chapter 7). Changing a RACI assignment or a role mapping does not rewrite the historical record of who held it before the change.

24.2 Current-Authority Doctrine

Prior approval, historical Memory of a decision, historical RACI or a past role assignment does not by itself establish current authority where this document requires current verification. This is the general form of the rule stated narrowly in Chapter 2 §2.2.

24.3 Emergency Change and Review Cadence

An emergency change to a governance assignment (e.g., following an emergency suspension under Chapter 22) still requires post-event review before being treated as a standing change. A periodic review cadence for this document as a whole remains a Human Review decision; no cadence is invented in its absence.

24.R RACI Assignment

Table 26. Chapter 24 RACI.

Governance Function	Accountable	Responsible	Consulted	Informed
Approve a change to NCIE-008 or a governance assignment	Accountable Authority Class (to be assigned)	Governance Programme Owner (to be assigned)	Affected chapter/domain owner	Assurance/Audit

Human Review Focus

- [INSTITUTIONAL CONFIRMATION REQUIRED] (Non-Blocking) HR8-24-1: Approve the periodic review cadence and the change-approval authority for NCIE-008 itself; does not block use of the governance assignments already made in Chapters 1–23.

Traceability: NCIE controlled-document conventions; approved NCIE-001–007 authority chain.

Human Review Register & Open Governance Decisions

Consolidate every unresolved institutional decision exposed across Chapters 1–26 into one register: deduplicated, consistently classified, each stating precisely what it blocks. No item here manufactures closure of a decision the approved upstream chain or the approved NCIE-008 Skeletal v0.1 does not itself settle.

Status: IN DEVELOPMENT — FOR HUMAN REVIEW.

Upstream: All chapters above; unresolved authority deliberately deferred to human governance, per approved NCIE-008 Skeletal v0.1 §–Human Review Register & Open Governance Decisions.

25.1 Purpose

This register exists so that no unresolved institutional choice is silently settled by expansion prose, and so that no chapter's own Human Review Focus item is left outside the consolidated register it is meant to feed. Every item from Chapters 1–24 below was extracted programmatically from that chapter's own Human Review Focus section (§25.4). Chapter 25's own item (HR8-25-1) and Chapter 26's own item (HR8-26-1) are each defined once as a fixed value and rendered identically both here and in their own chapter's Human Review Focus bullet, so that neither can be omitted from the register or drift from the bullet that also states it.

25.2 Summary

Table 27. Human Review Register summary (mechanically computed).

Classification	Count
INSTITUTIONAL CONFIRMATION REQUIRED	22
LEGAL/POLICY CONFIRMATION REQUIRED	1
PROPOSED DESIGN DEFAULT	1
RESOLVED BY UPSTREAM BASELINE	1
SECURITY/SOVEREIGNTY CONFIRMATION REQUIRED	1

26-1	er 26	authorize controlled full expansion — already satisfied by the approved NCIE-008 Skeletal v0.1 and the production directive that authorized this v1.0 expansion; preserved here as historical record, not a live open item.	BASELINE (Non-Blocking)	governance operation	d	upstream baseline
------	-------	---	-------------------------	----------------------	---	-------------------

25.4 Mechanical Verification

24 of these 26 items were recomputed programmatically from the Human Review Focus bullet text of Chapters 1-24 rather than assembled by hand. The remaining 2 items are HR8-25-1 (this chapter's own item, defined once as CH25_HR_ITEM and rendered identically in both this table and the Human Review Focus bullet below) and HR8-26-1 (Chapter 26's own item, defined once and rendered identically in both this table and Chapter 26). 0 duplicate Review IDs; 0 orphan Human Review items — every Human Review ID appearing anywhere in this specification is reconciled into this register. No chapter's Human Review Focus item is omitted and none is double-counted.

25.5 Blocking Scope Discipline

Each Blocking item states exactly what it blocks — a specific decision-right holder assignment, authority mapping or threshold — rather than implying the whole of NCIE-008 or the whole approved upstream chain is blocked. Non-Blocking items are explicitly proposed defaults or confirmations that do not gate the corresponding chapter's governance operation in the interim.

Human Review Focus

- [INSTITUTIONAL CONFIRMATION REQUIRED] (Blocking) HR8-25-1: Review this consolidated register and decide, for each Blocking item, whether it must be resolved before NCIE-008 v1.0 may be approved or may instead remain open under an interim governance default.

Traceability: All chapters above (mechanically reconciled register).

NCIE-008 — Chapter 26 Expansion

Traceability, Acceptance & Handover

Close traceability to the approved NCIE-001–007 foundation and the approved NCIE-008 Skeletal v0.1; define acceptance criteria and the downstream governance handover.

Status: IN DEVELOPMENT — FOR HUMAN REVIEW.

Upstream: Approved NCIE-001–007 foundation; NCIE-007 explicitly points governance/human authority to NCIE-008; approved NCIE-008 Skeletal v0.1.

26.1 Traceability Matrix

Every chapter of this document traces to an approved upstream authority or to the approved NCIE-008 Skeletal v0.1 itself. No chapter states a governance requirement without an identifiable source.

Table 29. Full traceability matrix.

NCIE-008 Chapter	Primary Upstream Authority	Relationship
Chapter 1	NCIE-002 Ch.4/Ch.24; NCIE-007 Ch.36	Governance boundary/mandate over approved foundation
Chapter 2	NCIE-002 Ch.4; NCIE-005; NCIE-007 §0.3	Authority-invariant doctrine
Chapter 3	NCIE-007	Actor/role separation
Chapter 4	NCIE-005/007; NCIE-006	Decision-right catalogue
Chapter 5	NCIE-007	RACI ownership assignment
Chapter 6	NCIE-007	Segregation-of-duties confirmation
Chapter 7	NCIE-001–007	Policy ownership mapping
Chapter 8	NCIE-007	Governance tiering layered on technical eligibility
Chapter 9	NCIE-007	Human Review process ownership
Chapter 10	NCIE-007	Acceptance/sign-off authority
Chapter 11	NCIE-007	Agent promotion/registration governance
Chapter 12	NCIE-007; NCIE-006	Dynamic/Ephemeral Agent governance
Chapter 13	NCIE-007	Model/provider approval governance
Chapter 14	NCIE-007	Tool/consequential-action governance
Chapter 15	NCIE-007	VPF governance
Chapter 16	NCIE-006/007	Knowledge promotion governance
Chapter 17	NCIE-006	Memory/Context governance
Chapter 18	NCIE-007	Evidence/Finding/Decision governance
Chapter 19	NCIE-005/007	ARGUS governance boundary
Chapter 20	NCIE-007; NCIE-009 (downstream)	Security/privacy/sovereignty governance interface
Chapter 21	NCIE-001–007	Exception/waiver/risk-acceptance governance

Chapter 22	NCIE-007	Emergency authority governance
Chapter 23	NCIE-003/006/007	Audit/assurance/compliance evidence
Chapter 24	NCIE controlled-document conventions	Governance change control/versioning
Chapter 25	All chapters above	Consolidated Human Review Register
Chapter 26	NCIE-001-007; NCIE-008 Skeletal v0.1	Traceability/acceptance/handover

26.2 Traceability Mechanical Verification

A programmatic scan of this document confirms exactly 26 sequential 'NCIE-008 — Chapter N Expansion' labels, N = 1..26, each present exactly once, in order, with no gap, duplicate or unintended renaming (directive item 66).

26.3 Skeleton-to-Full Fidelity Verification

Every approved Chapter Purpose, Salient Things to Note, Principal Components, Upstream Dependency Focus and Human Review Focus from the approved NCIE-008 Skeletal v0.1 is substantively represented in the corresponding full chapter above (directive item 65); none is omitted, and none is conceptually inverted.

26.4 Acceptance Criteria and the Unresolved-Item Gate

Full approval of NCIE-008 v1.0 requires: (a) 26/26 chapter integrity confirmed; (b) skeleton-to-full fidelity confirmed; (c) every Blocking Human Review item in Chapter 25 either resolved by an institutional decision or explicitly and knowingly deferred by the approving authority; (d) the §26.5 governance acceptance-test suite specified with no test falsely marked executed or passed; and (e) three-artifact consistency (this document, the Change Register and the Verification Report) confirmed. Approval of the v0.1 skeleton authorized this expansion only — it did not itself approve any RACI assignment, role mapping, threshold or governance default proposed above.

26.5 Governance Acceptance Tests

The production directive requires an explicit governance acceptance-test suite in addition to the acceptance criteria stated in §26.4. The 9 tests below cover, at minimum, every test class the directive names. Each test is SPECIFIED here; specifying a test is not executing it (TEST SPECIFIED ≠ TEST EXECUTED). For every test: IMPLEMENTATION EVIDENCE AVAILABLE = NO; TEST EXECUTED = NO; TEST PASSED = N/A (not applicable until executed); HUMAN/OPERATIONAL ACCEPTANCE = PENDING. Detailed test-case authoring, execution and automation are downstream in NCIE-016 (§26.6); no test below is claimed to have run.

Table 30. Governance acceptance-test suite.

Test ID	Test Name	Verifies	Status
GAT-1	Machine-Approval Substitution Test	Gate A, Gate B, VPF PASS, Agent success, model confidence and multi-Agent consensus cannot substitute for required Human/Institutional Approval (Ch.2, Ch.10, Ch.15).	TEST SPECIFIED
GAT-2	Segregation-of-Duties Test	Incompatible proposal/approval/execution/assurance functions cannot collapse contrary to the governed SoD rules (Table 7, Ch.6).	TEST SPECIFIED
GAT-3	Current-Authority Test	Prior approval, historical RACI, Memory or previous role assignment does not establish current authority where current verification is required (Ch.2 §2.2, Ch.24 §24.2).	TEST SPECIFIED

GAT-4	Agent Promotion/Registration Test	Promotion Candidate/recommendation does not create Registered Reusable Agent status without the governed approval/registration lifecycle (Ch.11).	TEST SPECIFIED
GAT-5	VPF/Human Review Separation Test	VPF validation state and HUMAN_REVIEW_REQUIRED remain distinct from Human Approval and institutional Decision (Ch.9, Ch.15).	TEST SPECIFIED
GAT-6	Emergency Suspension Test	Emergency suspension is traceable, scoped and temporary and does not silently become permanent revocation (Ch.22).	TEST SPECIFIED
GAT-7	Exception Expiry Test	An expired or revoked exception does not continue granting governance authority (Ch.21).	TEST SPECIFIED
GAT-8	Historical Decision Preservation Test	Later revocation, supersession or role change does not rewrite the historical governance decision that existed at the relevant time (Ch.23 §23.1, Ch.24 §24.1).	TEST SPECIFIED
GAT-9	RACI Completeness Test	Material governance decision classes have accountable/responsible governance treatment or an explicit Human Review item rather than an invented assignment (Ch.4, Ch.5, Ch.25).	TEST SPECIFIED

26.6 Downstream Handover Register

NCIE-008 does not preempt detailed downstream specification. The table below states what is handed over and what remains downstream.

Table 31. Downstream handover register.

Downstream Document	What NCIE-008 Hands Over
NCIE-009 (IAM/security engineering)	Governance decision points for privileged access, break-glass and residency/sovereignty exceptions (Chapter 20); technical enforcement remains NCIE-009's.
NCIE-011 (APIs)	Decision-right and approval-evidence contracts (Chapter 4/10) for any API surface exposing governance state; no API design is specified here.
NCIE-012 (UX)	ARGUS governance-representation rules (Chapter 19) for detailed conversational/visual design; no UX is specified here.
NCIE-014 (physical storage)	Logical governance evidence/record requirements (Chapter 23); no physical system or database is selected here.
NCIE-015 (operations)	Governance operational responsibilities (RACI, Chapter 5) for handoff into operational runbooks; no runbook is specified here.
NCIE-016 (detailed testing)	The 9 governance acceptance-test classes specified in §26.5 (Table 30); detailed test cases, execution and

automation remain downstream in NCIE-016 — this document specifies the tests, not their execution.

26.7 Readiness and Final Disposition

NCIE-008 Governance, Authority, Accountability & RACI Specification v1.0 — Full Expansion of Approved Skeletal v0.1 — is READY FOR HUMAN REVIEW. It is NOT marked Approved. The approved v0.1 skeleton remains historically preserved as the expansion architecture; every proposed RACI assignment, role mapping and threshold in Chapters 1–24 remains a proposal pending the Chapter 25 Human Review Register; every §26.5 governance acceptance test remains SPECIFIED, not executed, pending NCIE-016.

Human Review Focus

- [RESOLVED BY UPSTREAM BASELINE] (Non-Blocking) HR8-26-1: Approve the NCIE-008 skeletal structure and authorize controlled full expansion — already satisfied by the approved NCIE-008 Skeletal v0.1 and the production directive that authorized this v1.0 expansion; preserved here as historical record, not a live open item.

Traceability: NCIE-001–007 approved foundation; approved NCIE-008 Skeletal v0.1.
