

NCIE-011 Skeletal v0.1 → Full v1.0

Full-Expansion Change Register

API, Integration & Data Connector Specification — IN DEVELOPMENT / FOR HUMAN REVIEW

Maps each of the 32 approved NCIE-011 Skeletal v0.1 chapters to its expanded v1.0 location, states the authority basis for the expansion, and records the effect on that chapter's Human Review Focus item. No chapter was added, removed, merged, split or renumbered; every approved chapter purpose, Salient Things to Note, principal component, upstream dependency and Human Review focus is substantively represented below, including an explicit Salient Things to Note subsection in all 32 chapters (directive item 75 hard gate).

Human Review Register Reconciliation

32 Human Review items total: 30 items from Chapters 1-30 (one per chapter, mechanically extracted from each chapter's own Human Review Focus bullet text), plus HR11-31-1 (Chapter 31's own item) and HR11-32-1 (Chapter 32's own item) — both defined once and included in the register from the start, per the lessons learned from the NCIE-008 v1.0 correction (register-reconciliation omission) and the NCIE-009 v1.0 correction (Salient Things to Note omission), rather than discovered afterward. Classification breakdown: 19 Institutional Confirmation Required, 5 Security/Sovereignty Confirmation Required, 1 Legal/Policy Confirmation Required, 6 Engineering/Infrastructure Discovery Required, 1 Resolved by Upstream Baseline. 24 Blocking / 8 Non-Blocking. One item, HR11-1-1, is cross-referenced (not duplicated) against the identical institutional question already open as NCIE-008 HR8-10-1, per directive item 61's upstream-deduplication rule. No item manufactures closure of a decision the approved skeleton, the approved NCIE-008/009 layers, or the approved upstream chain does not itself settle.

Skeleton Fidelity Statement

Every approved Chapter Purpose, Salient Things to Note, Principal Component, Upstream Dependency/Authority and Human Review Focus from the approved NCIE-011 Skeletal v0.1 is substantively represented in the corresponding v1.0 chapter above, including an explicit Salient Things to Note subsection in all 32 chapters — independently re-verified against the final assembled document by a programmatic scan (directive item 75), not assumed from the build script; none is omitted and none is conceptually inverted (Chapter 32 §32.3).
