Full-Expansion Change Register

Functional Modules Specification — IN DEVELOPMENT / FOR HUMAN REVIEW

Formal-Title Reconciliation (Directive Item 3)

The Skeletal v0.1 working title 'NCIE-013 — Domain Functional Modules Specification' was checked against the Master Controlled Register per directive item 3. The authoritative source located is the NCIE Documentation Suite Master Controlled Register v2.0 (FOR APPROVAL, 02 September 2026), Section 3, whose NCIE-013 entry records the formal title as 'Functional Modules Specification' with a Primary Purpose matching this document's actual Network/Traffic/Revenue/Mobile Money/SIM Registration/Anti-Fraud/REWS scope exactly — a SEMANTIC MATCH / DOCUMENT-CONTROL WORDING DIFFERS result (the register omits 'Domain'; no material discrepancy). The document-control title has accordingly been corrected to 'NCIE-013 — Functional Modules Specification'; no approved chapter substance was altered. This is recorded as Human Review item HR13-1-1, which remains open pending institutional confirmation of acceptance authority and module ownership.

Pre-Approval Surgical Correction Record

This is a pre-approval correction applied to v1.0 while it remains IN DEVELOPMENT / FOR HUMAN REVIEW — not a v1.0→v1.1 amendment. Defect: the originally delivered v1.0 stated that no Master Controlled Register was supplied and retained the skeleton's working title unverified. Correction: the NCIE Documentation Suite Master Controlled Register v2.0 was located, its NCIE-013 entry retrieved, and the formal title reconciled as described above; the false source-availability statements in §0.1, §0.9 and HR13-1-1 were replaced with source-grounded statements. Result: document-control title wording corrected in the cover, §0.1, Document Governance table, Authority Chain, running header, §34.6 and core document properties. Substantive-architecture impact: NONE — all 34 chapters, all 34/34 Salient Things to Note subsections, the full domain-module architecture, and the 34-item Human Review Register (34 total / 30 Blocking / 4 Non-Blocking, 0 duplicate, 0 orphan) are unchanged and were independently re-verified after this correction.

Maps each of the 34 approved NCIE-013 Skeletal v0.1 chapters to its expanded v1.0 location, states the authority basis for the expansion, and records the effect on that chapter's Human Review Focus item. No chapter was added, removed, merged, split or renumbered; every approved chapter purpose, Salient Things to Note, principal component, upstream dependency and Human Review focus is substantively represented below, including an explicit Salient Things to Note subsection in all 34 chapters (directive item 71 hard gate).

Human Review Register Reconciliation

34 Human Review items total: 32 items from Chapters 1-32 (one per chapter, mechanically extracted from each chapter's own Human Review Focus bullet text), plus HR13-33-1 (Chapter 33's own item) and HR13-34-1 (Chapter 34's own item) — both defined once and included in the register from the start, per the lessons learned from the NCIE-008 v1.0 correction (register-reconciliation omission) and the NCIE-009 v1.0 correction (Salient Things to Note omission), rather than discovered afterward. Classification breakdown: 22 Institutional Confirmation Required, 5 Security/Sovereignty Confirmation Required, 3 Legal/Policy Confirmation Required, 3 Engineering/Infrastructure Discovery Required, 1 Resolved by Upstream Baseline. 30 Blocking / 4 Non-Blocking. One item, HR13-25-1, is cross-referenced (not duplicated) against the identical institutional question already open as NCIE-011 HR11-16-1, per directive item 60's upstream-deduplication rule. No item manufactures closure of a decision the approved skeleton, the approved NCIE-008–012 layers, or the approved upstream chain does not itself settle.

Skeleton Fidelity Statement

Every approved Chapter Purpose, Salient Things to Note, Principal Component, Upstream Dependency/Authority and Human Review Focus from the approved NCIE-013 Skeletal v0.1 is substantively represented in the corresponding v1.0 chapter above, including an explicit Salient Things to Note subsection in all 34 chapters — independently re-verified against the final assembled document by a programmatic scan (directive item 71), not assumed from the build script; none is omitted and none is conceptually inverted (Chapter 34 §34.3).
