

NCIE-018 Skeletal v0.1 → Full v1.0

Full-Expansion Change Register

Operational Handover, Organizational Readiness & Governance Specification — IN DEVELOPMENT / FOR HUMAN REVIEW

Register Supersession & Production Restart (Document-Control/Source-Authority Event)

Production of NCIE-018 was first attempted against the original 95-item Claude Full-Expansion Production Directive. Per directive item 3, the exact formal title was checked against the then-current NCIE Documentation Suite Master Controlled Register v2.0, which described NCIE-018 as a 14-chapter 'Master Production Handover Package' — materially inconsistent with the Human-approved 36-chapter Operational Handover, Organizational Readiness & Governance skeletal architecture. This was correctly identified as a MATERIAL scope discrepancy under directive item 3's own halt-and-report rule; production was halted before any expansion content was produced, and the discrepancy was reported for Human governance. Human governance subsequently reconciled the Documentation Suite, issuing NCIE Documentation Suite Production-Ready v3.0 RECONCILED (superseding the 17 August 2026 / 319-chapter catalogue for suite indexing and NCIE-018 production) and the NCIE-018 Superseding Source-Reconciliation & Full-Production Restart Directive (54 items, supplementing the original 95-item directive without replacing it). The reconciled v3.0 register now records NCIE-018 as 'Operational Handover, Organizational Readiness & Governance Specification', 36 chapters — an EXACT MATCH to the approved skeleton's own working title, requiring no wording correction. Production was restarted from the beginning per the restart directive; this pause-and-reconciliation sequence is recorded here as a successful governance stop condition and subsequent source-control reconciliation, not concealed. SUBSTANTIVE 36-CHAPTER ARCHITECTURE IMPACT: NONE — the approved skeleton was neither expanded, compressed, nor redesigned by this reconciliation.

Maps each of the 36 approved NCIE-018 Skeletal v0.1 chapters to its expanded v1.0 location, states the authority basis for the expansion, and records the effect on that chapter's Human Review Focus item. No chapter was added, removed, merged, split or renumbered, and no chapter was compressed into the superseded 14-chapter allocation; every approved chapter purpose, Salient Things to Note, principal component, upstream dependency and Human Review focus is substantively represented below, including an explicit Salient Things to Note subsection in all 36 chapters (directive item 84 / restart item 17 hard gate). No credential, password, token or key appears anywhere in the expanded specification (independently re-verified against the rendered PDF).

Human Review Register Reconciliation

36 Human Review items total: 34 items from Chapters 1-34 (one per chapter, mechanically extracted from each chapter's own Human Review Focus bullet text), plus HR18-35-1 (Chapter 35's own item) and HR18-36-1 (Chapter 36's own item) — both defined once and included in the register from the start, per the lessons learned from the NCIE-008 v1.0 correction (register-reconciliation omission) and the NCIE-009 v1.0 correction (Salient Things to Note omission), rather than discovered afterward. Classification breakdown: 29 Institutional Confirmation Required, 5 Security/Sovereignty Confirmation Required, 1 Engineering/Infrastructure Discovery Required, 1 Resolved by Upstream Baseline. 34 Blocking / 2 Non-Blocking. Every NCIE-018 item was individually checked against the existing HR1–HR17 registers per directive item 25's upstream-deduplication rule; none was found to restate an identical question verbatim, and Blocking upstream items are intaken as explicit dependencies (Table 4) rather than cloned into HR18. No item manufactures closure of a decision the approved skeleton, the approved NCIE-008–017 layers, or the approved upstream chain does not itself settle.

Skeleton Fidelity Statement

Every approved Chapter Purpose, Salient Things to Note, Principal Component, Upstream Dependency/Authority and Human Review Focus from the approved NCIE-018 Skeletal v0.1 is substantively represented in the corresponding v1.0 chapter above, including an explicit Salient Things to Note subsection in all 36 chapters — independently re-verified against the final assembled document by a programmatic scan (directive item 84 / restart item 17), not assumed from the build script; none is omitted and none is conceptually inverted (Chapter 36 §36.3).
